construction time!

Habitat Board Build

On Saturday January 22nd, Habitat for Humanity East Bay hosted a [build day](#) for members of their board of directors at their El Rincon site in Bay Point. Gary spent the day working with other board members installing roof trusses as framing continues on nine new homes. Gary has been involved with Habitat for a number of years now as a volunteer, a committee member, and a member of the board of directors. (Gary hides from the camera, so the picture at right is actually NOT him...)

Project Spotlight: Solar-Powered Access

Construction by [Precision General Contractors](#) is underway in Brentwood. An elevated steel walkway structure will provide an accessible path-of-travel to second-floor residents of three separate buildings at [Eden Housing](#)'s Brentwood Senior Commons. The walkway will be shaded from the summer sun by a 33kw photovoltaic panel array. An elevator and a lower electric bill? Everybody wins!
